Headteacher: Jo Greathead

29th April 2024

Dear Parents/Carers,

This term in PSHE (Personal Social Health Education) Badgers class will be learning about Health and Wellbeing. As part of the curriculum they will be learning about gender, including the differences between female and male bodies.

This learning will include the children learning the proper names for male and female genitalia. This will be taught through pictures of male and female animals as well as human bodies. The vocabulary they will learn is penis and vagina.

As well as these being the scientific words for our body parts, it is very important children use the correct terminology to avoid any confusion around sharing any safeguarding worries.

You can view the full PSHE curriculum on the [school website](#). However, if you have any questions please come and ask.

Kind regards,

Jo Greathead
